## UN Agenda21/Agenda 2030

**Maurice Strong** former UN Secretary General –Oil Billionaire quoted from UN Habitat: *“Land, because of its unique nature and the crucial role it plays in human settlements, cannot be treated as an ordinary asset, controlled by individuals and subject to the pressures and inefficiencies of the market. Private land ownership is also a principal instrument of accumulation and concentration of wealth and therefore contributes to social injustice; if unchecked, it may become a major obstacle in the planning and implementation of development schemes. Social justice, urban renewal and development, the provision of decent dwellings and healthy conditions for the people can only be achieved if land is used in the interests of society as a whole.”*

The environmental movement has been described as the largest and most influential social phenomenon in modern history. From relative obscurity just a few decades ago it has spawned thousands of organizations and claims millions of committed activists. Reading the newspaper today it is hard to imagine a time when global warming, resource depletion, environmental catastrophes and 'saving the planet' were barely mentioned. They now rank among the top priorities on the social, political and economic global agenda.

Environmental awareness has become a way of life. The once great awareness program is now a dictatorial mandate filled with senseless regulations based on MONEY, POWER, CONTROL. Grants and subsidies entice Multi-national companies to compete fiercely to promote their environmental credentials and 'out-green' each other. The threat of ecological disasters is uniting the world through a plethora of international treaties and conventions. But where did this phenomenon come from, how did it rise to such prominence, and more importantly, where is it going? What is its purpose?

**America Today:** You were born with rights, the government exists to protect them. You and the product of your labor belong to you.

### UN Declaration of Human Rights

Article 17 Sec 2:

Man's rights are granted by other men; as such, men can take them away.

**America Tomorrow:** Government grants, restricts or withdraws your rights according to its needs. You and the product of your labor belong to the community.

*“Effective execution of Agenda 21 will require a profound reorientation of all human society, unlike anything the world has ever experienced –a major shift in the priorities of both governments and individuals and an unprecedented redeployment of human and financial resources. This shift will demand that a concern for the environmental consequences of every human action be integrated into individual and collective decision-making at every level.”*

–signed by G.H. Bush, 1992

**Never ratified by the US Senate.**

*“We've got to ride this global warming issue. Even if the theory of global warming is wrong, we will be doing the right thing in terms of economic and environmental policy.” - Timothy Wirth,*  
President of the UN Foundation

# AGENDA 21 aka Agenda 2030 "New World Order" for America

## Agenda 21/2030

### Mission: Create Crisis

*"We need to get some broad based support, to capture the public's imagination..."*

*So we have to offer up scary scenarios, make simplified, dramatic statements and make little mention of any doubts... Each of us has to decide what the right balance is between being effective and being honest."*

- **Prof. Stephen Schneider,**

Stanford Professor of Climatology,  
lead author of many IPCC reports

### Find Someone to Blame:

"The common enemy of humanity is man. In searching for a new enemy to unite us, we came up with the idea that pollution, the threat of global warming, water shortages, famine and the like would fit the bill. All these dangers are caused by human intervention, and it is only through changed attitudes and behavior that they can be overcome. The real enemy then, is humanity itself." The First Global Revolution by Alexander King –Club of Rome

J. Gary Lawrence, 1998 UNEP Conference, UK  
*"Participating in a UN advocated planning process would very likely bring out many... who would actively work to defeat any elected official... undertaking Local Agenda 21/Sustainable Development. So we call our process something else such as "comprehensive planning," "growth management" or "smart growth."*

## Agenda 21 2030 Objectives: MONEY, POWER and CONTROL

Eliminate Unalienable Rights....

Unalienable Rights are individual rights granted by God, and can never be taken away unless you live under government control in a sustainable development.

Eliminate Private Property Promote:  
**SUSTAINABLE DEVELOPMENT**

Sustainable Developments means development of society that meets the needs of the present society without compromising the needs of future society to meet their own needs. (*You may do nothing without government approval!*)

Gro Harlem Brundtland, 1987, Hillary's friend.

Sounds great but it really means...

Transforming America from the land of the FREE to the land of the collective. (everyone lives the same, makes the same money, works for the government and has every facet of their lives regulated by the government").

Agenda 21/2030 uses the environment as 'bait' and works to indoctrinate and prepare your children to live under global rule while you pay the bill.

"This is the first time in the history of mankind that we are setting ourselves the task of intentionally, within a defined period of time, to change the economic development model that has been reigning for the, at least, 150 years, since the industrial revolution," Damn capitalism. UN Climate EX VP Christina Figueres said.

Use Government, Non Government Agencies, Non Profits take over communities by starting locally with grants, subsidies and regulations.
