

AGENDA 21 TODAY.com

Transforming America

FL legislators want to make Social Studies an elective.

I find it very interesting that lawmakers who may not be experts on a subject, like education, make laws that spend more money but do little to promote education.

I do not really believe that any legislator really wants to promote Anti-American rhetoric and Islam in our schools, yet they continue to accept money for programs designed to destroy America.

UN Agenda21

is the United Nations Goal for the 21 Century calling for the destruction of America through

- education
- suppression of Individual Rights, the Bill of Rights and the US Constitution replacing it with the UN Doctrine of Human Rights
- claiming that Humans are the

For over 15 years we have treated the symptoms and not the cause of our education failure. Regardless of how much money we give to education year after year we get exactly the same poor results.

Using SAT and ACT scores (not FCAT) students have **MADE LITTLE or NO PROGRESS in 15 years**. The schools teach how to be good globalists, not reading, writing and arithmetic. Our students graduate without knowing about American values, and they struggle with reading, writing and math. Today I learned that some legislators want Social Studies to be an elective. If that happens, say good-bye America.

[Check out the end where it mentions Social Studies!!!](#)

How much longer do we continue to repeat the past?

The fault of a poor education is a combination of many issues but if the curriculum is not also addressed, does tenure, school choice and texts really matter?

Race to the Top is just a ploy to give American education over to the UN. Teachers will have no choice and districts will be forced into unproven expensive global projects.

In addition, Florida has 5 charter schools that are run by Gulen, a Turkish

enemy of the earth

- elimination of private property

The UN Agenda 21 claims the western way of life is unsustainable. This doctrine calls for humans to be quartered in government controlled Sustainable Developments.

Education is our best hope. Once Americans understand they take action. [Read what is happening in Virginia](#)

Radical Islamist and on the FBI's most dangerous list. We have Florida text books promoting Islam at the expense of Christian-Judeau values. Where is the FLDOE? Where is Congressional oversight? Doesn't anyone monitor anything? The brightest students are now home schooled.

So I guess taxpayers should continue to give the FLDOE more money only to fail again.

Maybe a book burning rally in Tally would make the point. The textbooks are Anti-American trash.

No wonder why the best students are home schooled.

Maybe legislators don't read and understand Bills because they came from the same failed schools.

How about a citizens/legislators workshop of industry specific committees before each bill is formulated so that the laws will actually work when they are implemented?

Do Legislators understand the damage Common Core Standards, Race to the Top and national assessments will do to the students?

Do Legislators understand the costs?
The DOED is a great place to [CUT FUNDING](#)

Architect of RTT

Read [Marc Tucker's own words](#) regarding his approach to US education. Once George W Bush 41,

signed the USA onto the UNESCO global platform without Senate approval, American education suffered. No one was watching then and no one is watching now.

Our government's answer: globalization, more money and lower standards, all found in Race to the Top.

Our students are our legacy and they do not know America, do not understand fact from fiction and many can not read and write. Not representative of a bright future.

More Money for another Band-aid

Florida House Education Committee Passes Bills to Expand Educational Choice Scholarships, HB 1329, HB 1331

Jeb Bush, with [Foundation for Florida's Future](#) is also involved. Note that any mention of the curriculum is missing from his site. But he is involved in Race to the Top. Although his ideas are great they are merely tools, no one is checking what the student is learning.

Students learn:

- Anti-American globalist concepts. Just look at the texts.
- America is bad and competition and capitalism are evil.
- The Founding Fathers were just a bunch of old elitists and the Constitution, Bill of Rights are just old documents and must take a back door to the UN Bill of

Human Rights.

Today the UN is trying to pass laws stating that Mother Earth should have the same rights as Man. (this passed in Bolivia) and will be coming soon to a school near you.

Our students are taught that Man is the enemy of the earth. How is that good? Oh yes, I forgot. We can save a 2 inch fish from doom while we destroy 40,000 farm worker causing massive unemployment while turning lush farming land into a dust bowl. We can reduce the food supply to starve a few people (their hero Joe Stalin starved 40 million people) and force food prices to escalate. Isn't that a great plan?

Also the graph in the Bush plan is deceiving since the top score for NAEP is 500 and that was not mentioned. No matter how much money taxpayers spent in 15 years, Florida is still in the bottom half. Bush follows the global education agenda promoted in Race to the Top. **Education is about money and power.** Just look at the sponsors and beneficiaries who are implementing Jeb's goals.

Complexity is the enemy of reliability and efficiency. Florida Education is too complex and therefore doomed to fail. Too much money is spent on administrators justifying their existence then on student learning. Now is the time to make a real change and educate not indoctrinate our students.
