Thanks to Paula Helton for sending me this article. To add my own commentary: Earth First back in 1992 created the Wildlands Project. So this will give you an idea of how radical the group discussed in this article is.

After receiving the email above from Paula I became very interested in researching the Center for Biological Diversity. Thought you might be interested in another of their endeavors. Depopulation. If interested in their CBD condoms feel free to contact them. I have also asked Paula about creating a team to start researching these groups that our government is financing. If anyone would like to join a research team lets talk!!

The people of TN must be aware and understand what this initiative is all about. If you are or know a trucker you can best believe they understand what it is about. This is A21. Get trucks off the road. More unemployment!! This link was sent to me by Dr. Hayes (one of our members)

An article sent to me from Deb Caso

ENJOY MORE WITH LESS FOR THE SAKE OF SUSTAINABLE DEVELOPMENT. I think we landed in the twilight zone. Of course in this beautiful new eutopia there was no mention of water or food.....hmmmmm Funny how the fanatics are making all the decisions on how we live now and in the future. I am tired of being told how wonderful it is in Japan and other countries. We are America. They also mention scarcity of land. Land is only scarce because the Fascists have it sealed off. A little factoid for you to tuck away:

The United States has 1.93 billion acres of land. 108.1 million acres of that land is "developed" land.
