

**Agenda 21 will transform America but into what???**  
**CHANGES ARE COMING ----**

**Whether these changes are good or bad depends in part on how we adapt to them. But, ready or not, here they come.**

The United States is rapidly becoming the very first "post-industrial" nation on the globe. All great economic empires eventually become fat and lazy and squander the great wealth that their forefathers have left them, but the pace at which America is accomplishing this is absolutely amazing. It was America that was at the forefront of the industrial revolution. It was America that showed the world how to mass produce everything from automobiles to televisions to airplanes. It was the great American manufacturing base that crushed Germany and Japan in World War II.

**Because of Agenda 21 Redistribution of Wealth**, we are witnessing the deindustrialization of America. How does that work? Federal Agencies partnered with a UN agency like IUCN, UNESCO, ICLEI give grants of US borrowed dollars.

These same agencies using the phony science from the IUCN and UNESCO, to regulate "unsustainable" items until they are regulated out of existence and people are forced off their property. False reports like:

- Schools using anti-American, anti-free market texts inferior texts and curriculum graduate dumbed down students who become future voters
- NOAA using phony catch shares closes the fishing industry
- Man controls Climate, disproved by NASA scientists
- EPA – Wildlands, Endangered Species, Water Nutrients, Farmland, Dust
- Food Safety Act
- Obama Care
- Re-Zoning for sustainability
- Calling items unsustainable
- Dodd-Frank

Every aspect of human life will be controlled by the United Nations. Americans are then forced to make purchases of useless, inferior (in the case of food uninspected) items from companies who have shipped American factories overseas in order to avoid these same expensive regulations.

Tens of thousands of factories have left the United States in the past decade alone. Millions upon Millions of manufacturing jobs have been lost in the same time period. The United States has become a nation that consumes everything in sight and yet produces increasingly little. The replacement of, "Politics and Religion" in conversation, with media and entertainment has caused The United States to become bloated and spoiled. Our economy is now just a shadow of

what it once was. Once upon a time America could literally out produce the rest of the world combined. Today that is no longer true, but Americans sure do consume more than anyone else in the world. If the deindustrialization of America continues at this current pace, what possible kind of a future are we going to be leaving to our children?

The Agenda 21 Marxist Socialist ideology must make America flat, level, mediocre like the rest of the world in order to control its people. Instead of being taught individual exceptionalism leading to amazing innovation and discovery, our children are taught, "To be just like everyone else." Any great nation throughout history has been great at making things. So if the United States continues to allow its manufacturing base to erode at a staggering pace how in the world can the U.S. continue to consider itself to be a great nation? We won't. America will become mediocre, easy to control.

Agenda 21 Marxist ideology must destroy the American economy, the American Middle and American nationalism In order to complete a New World Order with a One World Government with the ELITE of the United Nations at the helm. American must be the focus of the world economic nightmare so that the destruction of the dollar will follow and the Elite can control all money through their own world bank. By design Americans have been saddled with the biggest debt bubble in the history of the world. Corrupt social programs, multiple wars and ramped illegal immigration have bloated the budget. By design the current state of affairs is not anywhere close to sustainable. Every single month America goes into more debt and every single month Americans get poorer.

So what happens when the debt bubble pops?

The deindustrialization of the United States should be a top concern for every man, woman and child in the country. But sadly, due to inadequate schooling most Americans do not have any idea what is going on around them.

Take this article and print it out and hand it out. Congress MUST DEFUND these corrupt agencies who are inhibiting growth in America.

### **Facts About The Deindustrialization Of America by Agenda 21. Make everything unsustainable and redistribute America's wealth**

**#1** The United States has lost approximately 42,400 factories since 2001. About 75 percent of those factories employed over 500 people when they were still in operation.

**#2** Dell Inc., one of America's largest manufacturers of computers, has announced plans to dramatically expand its operations in China with an investment of over \$100 billion over the next decade.

**#3** Dell has announced that it will be closing its last large U.S. manufacturing facility in Winston-Salem, North Carolina in November. Approximately 900 jobs will be lost.

**#4** In 2008, 1.2 billion cell phones were sold worldwide. So how many of them were manufactured inside the United States? Zero.

**#5** According to a new study conducted by the Economic Policy Institute, if the U.S. trade deficit with China continues to increase at its current rate, the U.S. economy will lose over half a million jobs this year alone.

**#6** As of the end of July, the U.S. trade deficit with China had risen 18 percent compared to the same time period a year ago.

**#7** The United States has lost a total of about 5.5 million manufacturing jobs since October 2000.

**#8** According to Tax Notes, between 1999 and 2008 employment at the foreign affiliates of U.S. parent companies increased an astounding 30 percent to 10.1 million. During that exact same time period, U.S. employment at American multinational corporations declined 8 percent to 21.1 million.

**#9** In 1959, manufacturing represented 28 percent of U.S. economic output. In 2008, it represented 11.5 percent.

**#10** Ford Motor Company recently announced the closure of a factory that produces the Ford Ranger in St. Paul, Minnesota. Approximately 750 good paying middle class jobs are going to be lost because making Ford Rangers in Minnesota does not fit in with Ford's new "global" manufacturing strategy.

**#11** As of the end of 2009, less than 12 million Americans worked in manufacturing. The last time less than 12 million Americans were employed in manufacturing was in 1941.

**#12** In the United States today, consumption accounts for 70 percent of GDP. Of this 70 percent, over half is spent on services.

**#13** The United States has lost a whopping 32 percent of its manufacturing jobs since the year 2000.

**#14** In 2001, the United States ranked fourth in the world in per capita broadband Internet use. Today it ranks 15th.

**#15** Manufacturing employment in the U.S. computer industry is actually lower in 2010 than it was in 1975.

**#16** Printed circuit boards are used in tens of thousands of different products. Asia now produces 84 percent of them worldwide.

**#17** The United States spends approximately \$3.90 on Chinese goods for every \$1 that the Chinese spend on goods from the United States.

**#18** One prominent economist is projecting that the Chinese economy will be three times larger than the U.S. economy by the year 2040.

**#19** The U.S. Census Bureau says that 43.6 million Americans are now living in poverty and according to them that is the highest number of poor Americans in the 51 years that records have been kept.

**#20 GE** after being bailed out by the American taxpayer is moving one of its profitable factories to China.

**#21** NOAA using phony science has closed the fishing industry causing Americans to buy fish from un-inspected foreign fish farms.

**#22** EPA using phony charts and maps claims America has no natural resources when in fact America has more natural resource than any other country in the world.

**#23** EPA rezones land into Wildlands projects to force people off private property closing many small businesses.

**#24** FDA closed farms that do not comply with regulations based on phony science.

**#25** FEMA and the Army Corp of Engineers flood farmland

**#26** NASA scientists prove that man and CO2 have nothing to do with climate and in fact the earth is cooling at a rapid pace.

**#27** EPA puts new restrictions on vehicles that may result in deaths due to weight of vehicles. Cost to consumer over \$11,000

**#28** Obama care provides free care for illegal immigrants. Huge expense for companies who will to curtail expansion or go out of business.

**#29** Grants of borrowed money are given to non-profits to build luxury condos for illegals while Americans live in cars and tents.

**#30 America the defender of Freedom will die.**

The Conservatives believe:

- fair scientific sensible regulation as described by the Constitution with the majority of the power back in the states hands.
- a government that is closest to home is the best to protect the individual. History (no longer taught in school) shows the smallest government has the least possibility for crime and corruption.
- They believe in the power of the individual
- They believe that the individual is responsible for their own actions and if properly taught, the individual will make the best decisions.
- Exceptional individuals will form exceptional groups to create exceptional things.

The Liberals want everything socialized. The people working must pay for the people not working. How does that work if the private businesses close and there are no jobs. Who pays for whom?

Liberals create a utopian society where the rich pay for the poor. But if there are no rich because they are regulated out of business, and can not create jobs, who is paying for anything?

Liberal policies fail because no one pays attention to the bottom line and they do not realize where do jobs come from?

Government jobs come from taxation not innovation. No one wants or is willing to pay for a government product because they don't produce anything. Government does not add extra revenue unless they tax someone someplace.

If regulation forces jobs off shore, there are no jobs, not one can pay taxes so how does the government get money to create jobs.

So how many tens of thousands more factories do we need to lose before we do something about it?

How many millions more Americans are going to become unemployed before we all admit that we have a very, very serious problem on our hands?

How many more trillions of dollars are going to leave the country before we realize that we are losing wealth at a pace that is killing our economy?

How many once great manufacturing cities are going to become rotting war zones like Detroit before we understand that we are committing national economic suicide?

The deindustrialization of America has become a national crisis.
