**a11**

Keep title "The Path to Sustainable Development"  
Don't bring up Agenda 21 until next slide  
abshers, 10/16/2011

# What Is Agenda 21?

**Agenda 21 is the 1992 action plan set forth by the United Nations in 40 chapters of a political agenda called U. N. Agenda 21 Sustainable Development (the agenda for the 21<sup>st</sup> century) to control most aspects of life.**

## Slide 2

---

**a12** omit the word "socialist"  
abshers, 10/16/2011

**a2** My communications consultant sent me a specific example where someone he knew made this comment - and the Knoxville Saul Alinsky-ites attacked him for it. (I'll forward you the email he sent me on this). He recommends saying most, not every. I know the correct term is every, I'm just passing along some of what I was told.  
abshers, 10/16/2011

## UN Agenda 21 Timeline

- ≥1987 Brundtland Commission publishes Our Common Future. Sustainable Development defined.
- ≥1992 George Bush signs agreement in Rio for the Administrative Implementation of Agenda 21 (Bush called it The Plan for One World Order)
- ≥1993 Bill Clinton by EO creates the "Presidents Council For Sustainable Development"
- ≥1996 Sustainable America A New Consensus for Prosperity, Opportunity and a Healthy Environment for the Future (Feb.)
- ≥1997 Counties and Mayors create - Joint Center for Sustainable Communities
- ≥2001 National Governors Assoc. Endorse Smart Growth
- ≥2011 Barrack Obama by EO 13575 creates the "White House Rural Council"
- ≥2012 (June) Earth Summit 20th Anniversary, In Rio.

# How Come I Have Never Heard of Agenda 21?

- ≥ It is by design and best explained by J. Gary Lawrence a Seattle Planner and contributor to the Presidents Council on Sustainable Development:
- ≥ “In the case of the U.S., our local authorities are engaged in **planning processes consistent with LA21** but there is little interest in using the LA21 brand. Participating in a UN advocated planning process would very likely bring out many of the conspiracy-fixated groups and individuals in our society such as the National Rifle Association, citizen militias and some members of Congress. This segment of our society who fear ‘one-world government’ and a UN invasion of the United States through which our individual freedom would be stripped away would actively work to defeat any elected official who joined ‘the conspiracy’ by undertaking LA21. **So, we call our processes something else, such as comprehensive planning, growth management or smart growth.**

# Wikipedia Definition of Sustainable Development

**Sustainable development (SD)** is a pattern of resource use, that aims to meet human needs while preserving the environment so that these needs can be met not only in the present, but also for generations to come. The term was used by the Brundtland Commission which coined what has become the most often-quoted definition of sustainable development as development that "meets the needs of the present without compromising the ability of future generations to meet their own needs." [1][2] Sustainable development ties together concern for the carrying capacity of natural systems with the social challenges facing humanity. As early as the 1970s "sustainability" was employed to describe an economy "in equilibrium with basic ecological support systems." [3] Ecologists have pointed to The Limits to Growth [4], and presented the alternative of a "steady state economy" [5] in order to address environmental concerns.

NATURE BEFORE MAN

# **The Goals of Sustainable Development**

- ≥ Change consumption patterns**
- ≥ Promote sustainable human settlements**
- ≥ Plan & manage all land resources, ecosystems, deserts, forests, mountains oceans, fresh water, agriculture**
- ≥ Rural development**
- ≥ Ensuring equity (social justice)**
- ≥ Increased power for NGOs**
- ≥ Redefine the role of business and finance resources**
- ≥ All of this is to be accomplished on a global, national, local level**

# 5 Paths to Sustainable Development

- ≥ **Wildlands (the rural plan)**
- ≥ **Smart Growth (the city plan)**
- ≥ **Stakeholder Councils/Government<sup>a1</sup> (local governing body)**
- ≥ **Public Private Partnerships (government controlled monopolies)**
- ≥ **Education (indoctrination, consensus not facts, global citizens with no alliance to family, God or country)**
- ≥ **The first two paths call for strict land use policies designed to tell humans where and how they will live**

**a1**

My communications consultant cautioned me against using this word... it brings out the attacks from the progressives.  
abshers, 10/16/2011

# Wildlands Project (the rural plan)

- ≥ **Created by David Foreman of Earth First (environmentalist)** a3
- ≥ **Re-wilding 50% of all land in every state (only wildlife managers and researchers will be allowed)**
- ≥ **Herd humans off rural land and into human settlements (Urban Growth Boundaries – stack and pack)**
- ≥ **The Wildlands Project became the blueprint for the UN's Biodiversity Treaty (which was never ratified by the Senate but being implemented just the same)**
- ≥ **These areas will be interconnected by "corridors of wilderness."**

a3

Again, we know this is correct, but is there a word that can be used instead of radical or extremist?  
abshers, 10/16/2011

# The Re-Wilding Plan

- ≥ **Take a large wilderness area with no human activity (National Park - Blue Ridge National Heritage Area in VA)**
- ≥ **Create a highly regulated buffer zone around the area which will require permits for almost every activity making it impossible for land owners to make a profit. EX: Down zoning requires 25 acres to build 1 home**
- ≥ **Eventually the land owner is forced to accept conservation easement relief to reduce the tax burden. In exchange the land owner loses the right to use the land**
- ≥ **As rural land is removed from the tax base the tax burden increases to the remaining land owners**
- ≥ **Now the buffer zone is expanded and they just keep doing this until 50% of all land is off limits to growth or use of any kind.**
- ≥ **This is how we move people into the human settlements one step at a time.**

a4

I'd say all, not every.  
abshers, 10/16/2011

Pacific

Spine of the Continent

Boreal/Arctic

Atlantic

# Smart Growth (the city plan)

- ≥ **Once moved to the city a line will be drawn around the city (VA calls this Urban Development Areas)- no growth to take place outside of the line - land outside the line will be worthless - while land inside will be extremely expensive/high taxes**
- ≥ **Limited space inside will create a housing shortage**
- ≥ **Population controls will be needed to address congestions, air pollution and housing shortage.**
- ≥ **Green regulations for home building will be very bureaucratic and expensive (higher cost for housing will create higher taxes)**
- ≥ **Refuse to build or repair roads to get you out of your car and into public transportation - limit mobility**
- ≥ **Strict regulations on what you can do. Permits to remove a tree, plant a garden, what materials can be used to build a home, tiered rate for water usage, energy audits that will result in costly refitting of a home on order to meet ones' daily needs for water and energy.**

# Wikipedia Definition of Smart Growth

**Smart growth** is an urban planning and transportation theory that concentrates growth in compact walkable urban centers to avoid sprawl and advocates compact, transit-oriented, walkable, bicycle-friendly land use, including neighborhood schools, complete streets, and mixed-use development with a range of housing choices. The term 'smart growth' is particularly used in North America. In Europe and particularly the UK, the terms 'Compact City' or 'urban intensification' have often been used to describe similar concepts, which have influenced Government planning policies in the UK, the Netherlands and several other European countries.

# Simulated Reserve and Corridor System to Protect Biodiversity

As Mandated by the Convention on Biological Diversity, The Wildlands Project, UN and US Man and Biosphere Program, and Various UN, US Heritage Programs, and NAFTA

- Core Reserves & Corridors  
Little to no human use
- Buffer Zones  
Highly Regulated Use
- Normal Use--Zones  
of Cooperation
- Border 21/La Paz Sidebar  
Agreement of NAFTA  
124 Mile Wide International  
Zone of Cooperation
- Indian Reservations
- Military Reservations
- Cities >10,000 people
- Major Highways and Interstates
- Rivers

Taken From: The United Nations Convention on Biological Diversity, Article 16; United Nations Global Biodiversity Strategic Plan; UN/US Heritage Corridor Program; "The Wildlands Project"; WildEarth, 1992. Also see Science "The High Cost of Biodiversity," 20 June 1992; pp 1868-1871 and the Border 21 Sidebar of NAFTA. The very high percentage of buffer zone in the West is due to the very high percentage of federal land. Do not use for real estate purposes.

# Stakeholder Councils/Government

a6

- ≥ **Non-Elected ruling class inside the human habitat called Stake Holder Councils**
- ≥ **NGO's enforce their own private agenda**
- ≥ **You will have to ask them for permission (usually denied) for anything necessary to live in the community**
- ≥ **They control and ruin business. In SF, CA there can only be 7 McDonalds even if demand could support more.**
- ≥ **They dictate the kind of building materials you can use to build homes, whether you can build at all, they may allow you to build then not allow water or electricity**
- ≥ **Extremely controlling and you can just imagine the corruption surrounding this type of set up.**
- ≥ **A system of councils that report to an apex council and then implement a predetermined outcome.**
- ≥ **These councils are an operating mechanism of a government-controlled economy**

a7

a8

a9

## Slide 14

---

- a6**      How about "Non elected ruling class"  
abshers, 10/16/2011
- a7**      **dictate**  
abshers, 10/16/2011
- a8**      **Wow - is this really what they are called?**  
abshers, 10/16/2011
- a9**      **Is that what they are called.**  
abshers, 10/16/2011

# Stakeholder Councils/Government

- ≥ A complete re-engineering of our government
- ≥ Stakeholder councils and **non-elected boards** and **regional government**
- ≥ Will be impossible to speak with elected officials
- ≥ Government sanctioned monopolies
- ≥ Councils will decide who builds what and how.
- ≥ GHI - Gross National Happiness to replace Gross National Product to measure the health of our nation. Use social trends that affect quality of life rather than economic health.
- ≥ Happy Planet Index - long and happy lives must be the economies ultimate goal and not merely insatiable economic goals.
- ≥ These plans come from official documents from the state of MD.

# Public Private Partnerships

- ≥ **Government sanctioned monopolies. Only those approved by internationally recognized Leadership in Energy & Environmental Design (LEEDS) will survive.**
- ≥ **A favored few are granted special favors like contracts, tax breaks, eminent domain, non-compete clauses, specific guarantees of return on investments**
- ≥ **They can charge whatever they want and can use the power of government to put competition out of business. This is not a system of free enterprise**
- ≥ **GE forcing "green" light bulb on you charging 5Xs the price of incandescent. They put their own product out of business**
- ≥ **PPPs are building the TTC**
- ≥ **PPPs are taking over highways and local water treatment plants**
- ≥ **PPPs controlling the water can also control consumption**
- ≥ **Success as a PPP is not based on quality of product but by who you know**
- ≥ **In order to become a PPP you must buy-in to Sustainable Development and help to implement it even if that means destroying your own product**
- ≥ **This is why Home Depot uses it commercials to oppose cutting down trees, British Petroleum advocates reducing the use of oil**

# Education

- ≥ **Chapter 36 of A21 makes it clear an intention to integrate A21 into ALL curriculum as a de facto international education standard**
- ≥ **SD education began in the US with No Child Left Behind Act to reinforce the US commitment to the UN Educational, Scientific and Cultural Organization (UNESCO) goals for education.**
- ≥ **Race To The Top is the new program implemented by President Obama's administration.**
- ≥ **Consensus instead of fact or <sup>a10</sup>critical thinking.  $5+5=11$  if the consensus agrees.**
- ≥ **Eventually the government will decide our children's career path. The 3 R's have been replaced with the 3 E's.**
- ≥ **The intent is to destroy our children's alliance to God, family and country. To align themselves with the collective and the One World Government**
- ≥ **The US Dept. of Education carefully insulated themselves from critics of this radical plan by funding tax-exempt, NGO's to do their dirty work. Sometimes an NGO is several layers removed from its true funding source.**

**a10**

add: (West High School, Knoxville)  
abshers, 10/16/2011

# What Is Unsustainable?

- ≥ **Private property, single family homes**
- ≥ **Large hoofed animals**
- ≥ **Population growth**
- ≥ **Grazing of livestock, plowing of land, modern agriculture equipment**
- ≥ **Timber and logging activities**
- ≥ **Refrigeration, air conditioning, irrigation**
- ≥ **Golf courses, ski slopes**
- ≥ **Modern agriculture equipment**
- ≥ **Paved roads, fences, paddocks, dams**
- ≥ **Pesticides, fertilizers**
- ≥ **Fossil fuels**
- ≥ **Consumerism**

**This is a partial list. The source for this list is the UN Global Biodiversity Assessment Report.**

# Is Agenda 21 Real? You Decide!

# How Does This Affect Me?

- ≥ NGO's (ICLEI, APA, Chamber of Commerce etc) obtain funding from the Government (remember these sustainable grants were created to promote Agenda 21) and Foundations to fund the projects.
- ≥ They dangle the golden carrot (free money – TAX PAYER MONEY) in front of elected officials with all sorts of promises and of course it's all optional.
- ≥ Optional until you want money in the future for roads or other projects.
- ≥ Once they entice your local officials with the golden carrot the public input sessions begin. But when you go to these meetings the priorities are already established. None of these priorities state the protection of private property.
- ≥ If they do allow you to determine your priorities the list that comes from that session will look nothing like the list you created. All lists in all cities/counties/states have the same underlying theme.
- ≥ Planners use templates created by the APA. This predetermined plan is your indication that there is a plan but it is not a plan created for YOUR community it is their plan to accomplish the goal established by our government in guidelines for the grant money they accepted.
- ≥ Remember what we have already discussed. Rural plan. City plan.

# What Can You Do?

- ≥ **Get involved and pay attention to what is going on in your community**
- ≥ **Schedule a couple hours each month to attend city/county meetings**
- ≥ **Organize!!**
- ≥ **Question and challenge decisions being made for your community**
- ≥ **Educate yourself and others**
- ≥ **Elect people to sit on School Boards, City Council, County Commission that understand the Constitution and by their actions support your right to own and manage private property.**
- ≥ **RUN FOR OFFICE. If Not Now – When? If Not Us – Who?**
- ≥ **Do not allow your local government to accept government funding for growth and planning projects.**

*"Socialism is a philosophy of failure, the creed of ignorance, and the gospel of envy, its inherent virtue is the equal sharing of misery."* Sir Winston Churchill

**IT IS TIME FOR YOU TO MAKE A DECISION!**

**Sustainable Development  
or  
Sustainable Freedom -**

**WHICH WILL YOU CHOOSE??**
