**Conservation Lands are Categorized by Lead Managing Agency**

Conservation lands include public and some privately owned lands managed for conservation of their natural resources; public lands that are not managed for conservation (e.g., schools and prisons) are not considered conservation lands and are not included in this data set.

Conservation lands acreages are tabulated by county from the FNAI FLMA GIS data layer. These totals do not include open water on FLMA boundaries.

Additional acres of managed areas, tracked in FNAI's database with no GIS boundaries, are added for the final total.

FNAI tracks some additional managed areas without definitive acreage-by-county information.

Those acreages are not reflected in this table

Recent acquisitions may not yet be reflected in acreage totals.

County areas are derived from the National Association of Counties.

State includes lands managed by state agencies and water management districts.

Florida has more than 5.5 million acres of *public hunting lands*, giving us one of the largest wildlife management area systems in the nation.

To find out about hunting opportunities on public lands visit

<http://myfwc.com/hunting> or go to <http://myfwc.com/hunting/wma-brochures>.

There, you will find a link to WMA brochures (containing maps) and a statewide map that shows all the WMAs.

Approximately 1.7 million acres of Florida's remaining natural areas have been invaded by nonindigenous plant species, which have degraded and diminished our ecosystem.
