

## WHAT YOU CAN DO

1. Attend City Council and Board of Supervisors meetings and learn to recognize and resist the trend to replace political boundaries with "regional governance."
2. Encourage elected office holders to refuse local government receipt of federal money for new Sustainable Development programs because they raid the treasury. Withdraw from established programs.
3. Avoid local government partnerships with the **federal government, NGO's (Non Governmental Organizations)**, foundations and corporations that advance Sustainable Development.
4. Encourage public officials to enforce and protect individual rights.
5. Know and understand the Constitution to which elected officials swore an oath. Article I, Section 8, and the 9th, 10th and 14th Amendments.

If Americans come to a *timely* understanding of the threat and face the challenge squarely, the deceptive fraud will come to light. Together, we will rise to restore Liberty through a renewal of reason and respect for individual liberty. The looming battle of ideas should be recognized as a classic--and perhaps ultimate--battle between Liberty and Tyranny.

# WHAT IS

EARTH SUMMIT  
AGENDA  
21  
THE UNITED NATIONS  
PROGRAM OF ACTION  
FROM 2002

**The AGENDA for the 21st CENTURY**  
"A comprehensive plan of action to be taken globally, nationally and locally by organizations of the United Nations System, Governments, and Major Groups in every area in which human beings impact the environment."

## WHY IS EVERYONE TALKING ABOUT AGENDA 21?

UN Agenda 21/Sustainable Development is the action plan to inventory and control all land, all water, all minerals, all plants, all animals, all construction, all means of production, all information, all energy, and all human beings in the world. It's about **INVENTORY AND CONTROL**.

Far from being a "conspiracy theory" this is an actual United Nations plan, signed onto in 1992 by President George HW Bush along with 178 other world leaders. The UN called it Agenda 21 because it is the Agenda for the 21<sup>st</sup> century. According to UN Secretary General Maurice Strong, "the affluent middle-class American lifestyle is unsustainable." That includes single family homes, private vehicles, appliances, air-conditioning, & meat-eating. They are a threat to the planet.

How does this affect you? Agenda 21 is implemented first locally, through plans called Sustainable Development consisting of the the **3 E's**:

**Equity:** The "collective" trumps individual rights.

**Economy:** Redistribution of Wealth

**Environment:** Nature above Man

## SUSTAINABLE DEVELOPMENT

Sustainable Development is a plan for global control including the restriction of land use and resource extraction. The land use element calls for two action plans: the **Wildlands Project** and **Smart Growth**.

*The Wildlands Project* is the plan to eliminate human presence on "at least" 50% of the American landscape. Examples include road closures, dam removal, habitat "protection" and "conservation easements" and direct land acquisitions from battered "willing sellers."

*Smart Growth* is the centralized control of every aspect of urban life: energy and water use, housing, population control, public health, "social justice", transportation modes (high-speed rail) business and economic activity including Cap and Trade.

## WHAT'S WRONG WITH SUSTAINABLE DEVELOPMENT?

It is restructuring our lives and is targeting our children through educational programs that develop collectivist attitudes, values and beliefs. Sustainable Development documents call for the abolishment private property rights and the freedom that private property supports. Considered unsustainable under this plan: middle class lifestyle, single family homes, private vehicles, appliances, air conditioning, dams, farming and YOU.

President Clinton created the President's Council on Sustainable Development for the sole purpose of getting it into every city, county, and state in the US through federal rules, regulations, and grants. This is a global plan but is implemented locally. You'll see it as a regional plan. ...all of these regional plans are the same. They call for stack and pack housing, restricted mobility, and regional government.

## WHAT IS REGIONALISM?

It is another layer of government that is unelected and unaccountable to you. A manipulation designed to remove the sovereignty from local governments who have been grabbing for grant money. Regionalism is the antithesis of representative government, where unelected and unaccountable "experts", "specialists" or "stakeholders" recommend a course of action that eventually becomes law. Regionalism restructures or reinvents the operation of government affecting transportation, water, farming and land use systems....literally every aspect of your life. It is a tool being used to destroy traditional political boundaries, such as county lines. Regionalism ushers in a transformed system of governance that ultimately abolishes private property.
